BURGESS PIGMENT, LLC

Effective October 13, 2026, Burgess Pigment, LLC will implement a 50% restocking fee based on the original invoice rate per ton. The following additional conditions apply to all returned materials:

- If the material is customer coded, uniquely marked, or palletized in a non-standard configuration, we may not be in a position to offer credit as the material may be unsaleable. The fitness for resale will be determined by Burgess personnel upon receipt.
- Material lot number must be not more than twelve months old.
- Any material to be returned will be credited based on our receiving personnel's count of undamaged material received on our dock.
- Return freight will be the responsibility of the party returning the material.
- No credit will be issued for stretch-wrapping as it will be destroyed in the process of removing it for restacking or during the process of blurring or newly stenciling customer specific codes or marks.
